## **System Professional**

Each of System Professionals care treatments starts with an Energycode Mapping to identify your unique energy profile. This allows us to analyse your hair and scalp's specific needs, which are as unique as your fingerprint.

Based on this analysis, your System Professional Hair Care Consultant will prescribe an ultra personalised system of care treatments, for use in salon and at home.

The result is hair that is more responsive, full of energy and lastingly beautiful.

# OLAPLEX™

Olaplex contains a unique chemistry which restores strength, structure and integrity internally.

Colour, lightening, straightening, perms, heat styling and even putting tension on wet hair (combing/brushing to detangle) causes damage inside your hair. You don't see it when it happens, but you can feel it, and you definitely see it over time.

The tiny bonds that make up your hair are being compromised during these services. Olaplex is a single active ingredient, designed to reconnect the disulphides sulphur bonds by seeking out this hidden damage, and reinforces those bonds, making them stronger, more flexible, and more resistant to breakage. This in salon treatment is free of silicones, oils, aldehydes and parabens.

*'The only thing Olaplex changes is everything'*

## **OLAPLEX™ Duo**

**Price on consultation**

To really give hair the most intense therapy, G&M also recommend Olaplex as a colour upgrade.

From natural colours to ombré and balayage, whether you have highlights, gloss or permanent to help cover greys, upgrading to Olaplex for your colour service will leave your hair condition feeling stronger, healthier and repaired, while your colour is shiny, vibrant and longer lasting.
